Dubai, Vacancy Rate, %

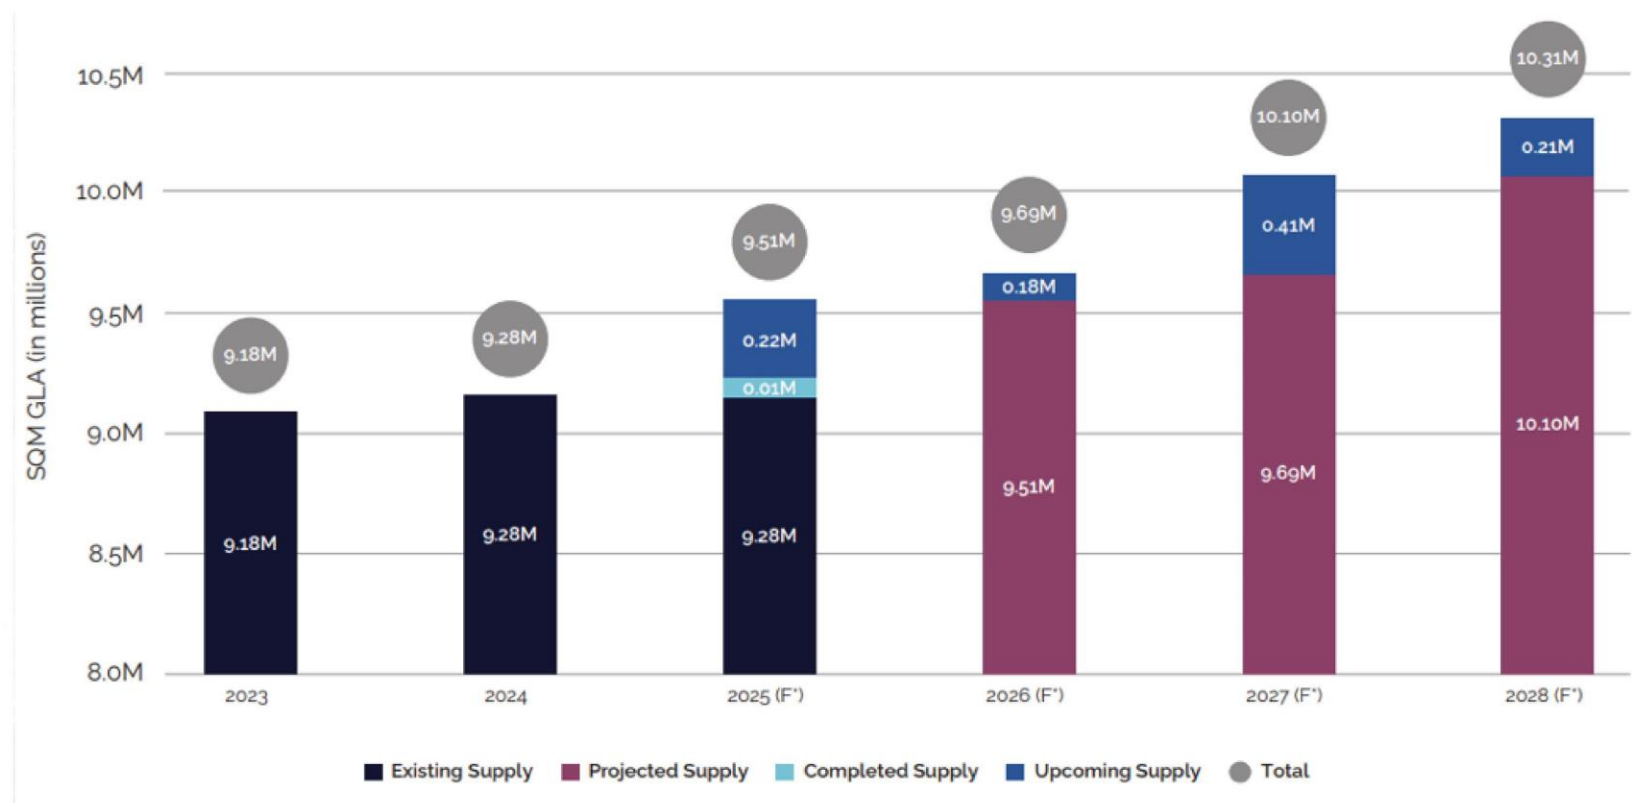

Source: JLL Research, 2025

- Limited availability of space and strong demand continue to put pressure on vacancy rates in Dubai. Particularly for Prime and A-Grade properties, which have reached a low of 0.3% and 3.5% respectively in Q2.
- The overall citywide vacancy rate has also dropped to 7.5%, down from 11.1% a year earlier, as occupiers continue to secure the limited quantity of available space.
